

## Unauthorised Access to Dowse Vehicles

It is the Policy of Dowse haulage ltd that no unauthorised persons shall be allowed to use, travel in, or enter any Dowse company vehicle.

When a Dowse lorry is discharging or loading no persons other than a qualified Dowse Driver / operator is permitted to enter, operate or interfere with the vehicle unless authorised to do so by Dowse haulage management.

Due to safety reasons a Dowse lorry, when discharging and the engine is running, does not require the door of the cab to be locked. The management at Dowse haulage does not regard the issuing of spare keys a necessity, as these can be lost, and in the event of an emergency to stop the engine, if the doors were locked or the driver unconscious would not be possible.

An emergency shutdown procedure card is displayed at the controls whilst the vehicle is discharging, in the event of an emergency a site operative is able to shut down the system.
